

Find a Needle? Request a Cleanup!

If you spot improperly discarded needles, pipes, or other substance-use related garbage, **request a cleanup!**

The Peer Team will come within **3 business days** to clean up the area.

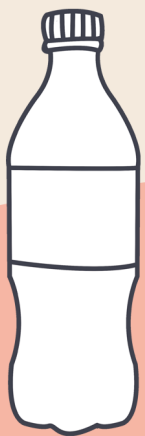

SCAN THE CODE to get to the request form.

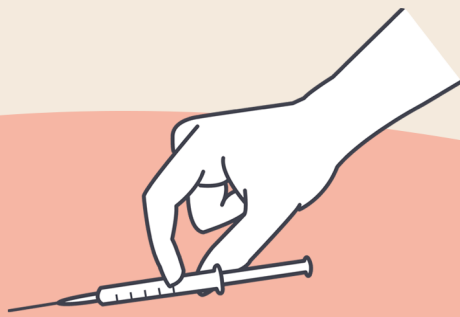

You can also make a request proactively! Use the form to notify us about a "hot spot" where stuff tends to accumulate.

Don't want to wait?

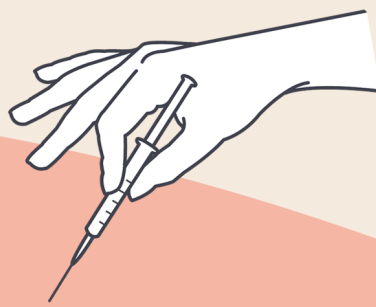

HOW TO CLEAN UP A NEEDLE:

1. Find a rigid plastic container with a lid. Beverage bottles work well.

2. Pick up the needle by the barrel of the syringe.

3. Point the needle down and away from you.

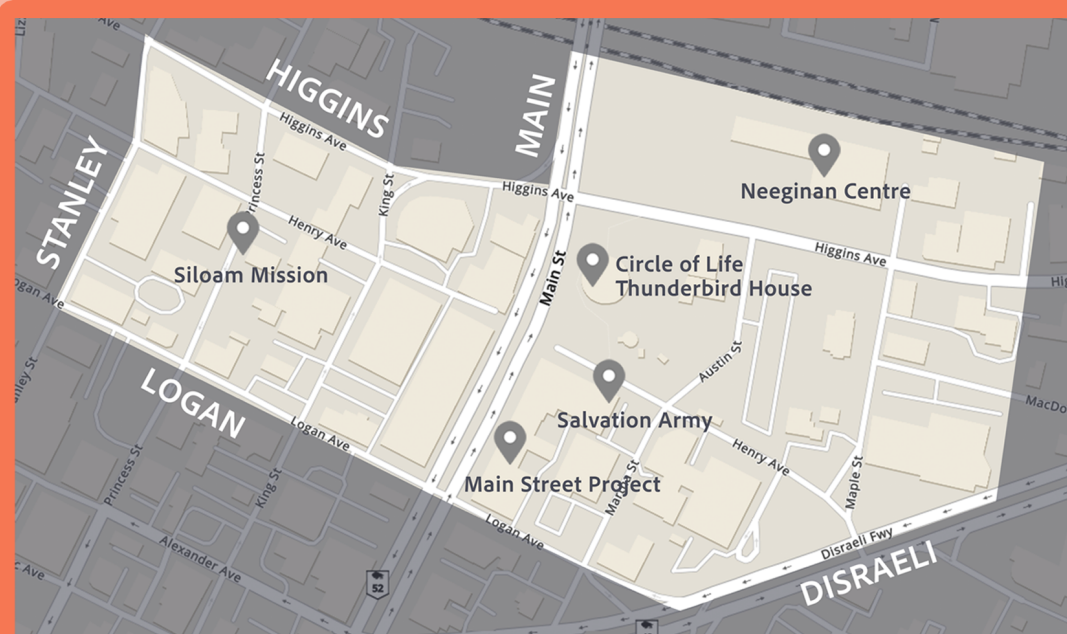

4. Put the bottle on the ground. Without touching the bottle, carefully place the needle pointy end first into the bottle. Close the lid. Wash your hands with soap and water.

5. Drop the sealed bottle at a pharmacy, or community health centre. Or throw it away in the regular trash!
